CANADIAN LIGHTING MANUFACTURER

COMMERCIAL · AGRICULTURAL · INDUSTRIAL

Service, Quality and Innovation

GET MORE LIGHT.

Since 2014 JW LED Inc. is a local manufacturer providing the industry with high quality LED light fixtures for all applications.

The journey began when in our fabrication shop the trusty old fluorescent lights were burning out. There was talk of LED lights, the latest and greatest in the history of all lighting. From all that was available we only found the LED tubes but not the metal fixtures. Motivated by that fact, an urge to create our own fixtures came to life. We had our own machines and with the paint shop not far away, drawings were made and some time was spent and before too long the first fixtures were cut and bent. We assembled these fixtures, put the LED tubes in and up they went. Little by little we got some requests for these fixtures from our neighbors and friends, so upgrades were made and so on it rolled.

JW LED Inc. offers fully certified lighting packages for **INDUSTRIAL, AGRICULTURAL** as well as **COMMERCIAL** applications. We manufacture our fixtures locally. Beginning with laser fabrication going over to powder painting then finishing with assembly and stocking.

Using high grade aluminum for our LED boards and only buying top end LED Chips gives our boards ratings to run for more than 50,000 hours. With our own SMT line we are capable of populating the LED boards with a variety of IN STOCK color options from Warm White to Cool White. The LED Driver is the ENGINE of a light fixture and the drivers we use are currently chosen because of PERFORMANCE and DURABILITY. We stock these parts for each fixture we make and they are covered by our 5 year standard warranty allowing us to provide AFTER SALES SERVICE.

Our main focus is to provide installers and home owners with competitive, always in stock unique light fixtures that are easy to install and suitable for the application while providing enough or more than enough light for the area.

Contact us today for more details.
