BA Series

1'x4' Commercial/Industrial Grade Highbay

10,000-19,500 Lumens

MADE IN CANADA

Product Description

The BA Series 1'x4' fixture is precision-engineered for expansive illumination with a wide 120-degree distribution angle, making it ideal for applications requiring broad coverage. Designed for mid to high ceilings, it offers versatility with various lumen packages and mounting options. Its robust thermal design ensures reliable performance in challenging conditions, suitable for installation heights from 15 to 30 feet. Handcrafted in Ontario, Canada, it's the ideal choice for your lighting needs.

Application

This unit is a great option for industrial, commercial or agricultural buildings such as metal fabricating shops, woodworking shops, storage sheds, warehouses, drive sheds, on farm shop's, grocery stores, tool stores, airplane hangers, hockey rinks, hobby shops and many more. Reccomended Installation Height Is 15 to 30 Feet.

Features

• Configurations exceeding 160 lm/w
• Slim profile 1.75" thick for tight fit spaces
• Standard 0-10V dimming for control/precision
• Robust LED boards made in house by JW LED Inc.

Options

• Wide range of lumen outputs
• Variety of motion sensors or controls
• Customizable color temperature or CRI values
• Pre-wired whips for quick installation

Mounting

• Surface mount (This unit can be mounted directly to any ceiling or wall)
• Suspension mount (Add the chain hangers in the ordering code)

Approvals

Approved for use in Canada and USA, QPS Certified

Warranty

Standard 5 year warranty, view our warranty policy for full details

SP Series
4' Linear Commercial/Industrial Grade Lowbay
2,000-10,000 Lumens

MADE IN CANADA

Product Description

The SP Series Linear 4' fixture is meticulously engineered to provide expansive illumination with a wide distribution angle, making it perfect for applications needing broad coverage on medium to low ceilings. It offers versatility with multiple lumen packages and mounting options. Its innovative design facilitates easy row mounting, transforming two fixtures into an 8-foot unit, suitable for installation heights ranging from 6 to 20 feet. Handcrafted in Ontario, Canada, it represents the ideal choice for your lighting requirements.

Application

This unit is a great option for industrial, commercial or agricultural applications such as metal fabricating shops, mezzanines, garages, offices, hallway's, workbenches, grocery stores, tool stores, retail stores, airplane hangers, repair rooms, hobby shops and many more. Reccomended Installation Height Is 6 to 20 Feet.

Features

• Configurations exceeding 160 lm/w
• End to end mountable for 8 foot fixture
• Standard 0-10V dimming for control/precision
• Robust LED boards made in house by JW LED Inc.

Options

• Wide range of lumen outputs
• Variety of motion sensors or controls
• Customizable color temperature or CRI values
• Pre-wired whips for quick installation

LZ Series
Vaportight Narrow 4' Body
2,000 - 8,000 Lumens

MADE IN CANADA

Project:
Location:
Cat.No:
Notes:

Product Description

The LZ Series Narrow Body 4' fixture is a sleek low profile vaportight fixture, ideal for applications needing extensive coverage on medium to low ceilings. It offers versatility with multiple lumen packages and mounting options, featuring various latch and lens styles. The casing is made in the USA with a robust build and a thick seal for durability in dusty or wet environments, it suits installation heights from 6 to 16 feet. Final assembly in Ontario, Canada ensures meticulous craftsmanship, making it the ideal lighting solution for your needs.

Application

This unit excels in industrial, commercial and agricultural settings where protection against water and dust is crucial. It thrives in applications such as washbays, dairy barns, sheep barns, horse barns, pig barns, welding factories, concrete factories, car washes, and more. Recommended for installation heights ranging from 6 to 16 feet, it's an exceptional choice for demanding environments.

Features

• Configurations exceeding 140 lm/w
• Robust LED boards made in-house by JW LED Inc.
• Standard 0-10V dimming for control/precision

Options

• Wide range of lumen outputs

LZ Series
Vaportight Wide 4' Body
27,000 - 36,000 Lumens

JW LED

MADE IN CANADA

Product Description

The LZ Series Wide Body 4' fixture is a high output vaportight fixture, ideal for applications needing extensive coverage on high ceilings. It offers versatility with multiple lumen packages, mounting options, lens styles and sensors. The casing is made in the USA with a robust build and a thick seal for durability in dusty or wet environments, it suits installation heights from 16 to 40 feet. Final assembly in Ontario, Canada ensures meticulous craftsmanship, making it the ideal lighting solution for your needs.

Application

This unit excels in industrial, commercial and agricultural settings where protection against water and dust is crucial. Such as washbays, food storage warehouse, food processing plants, warehouses, welding factories, concrete factories, drive sheds, and more. Recommended for installation heights ranging from 16 to 40 feet, it's an exceptional choice for demanding environments.

Features

• Configurations exceeding 140 lm/w
• Robust LED boards made in-house by JW LED Inc.
• Standard 0-10V dimming for control/precision

Options

• Wide range of lumen outputs
• Variety of lens options
• Motion sensor controls
• Pre-wired whips (Specify in ordering code if required)
Mounting

• Surface mount (This unit can be mounted directly to any ceiling or wall)
• Chain mount (Specify in ordering code)

WL Series

Winglight, 4 Foot Narrow Body Vaportight Poultry Specific Lighting

2,000 - 8,000 Lumens

MADE IN CANADA

Project: _____
Location: _____
Cat.No: _____
Notes: _____

Product Description

The Winglight Series is the culmination of extensive research and development in poultry lighting, providing flicker-free illumination with smooth, seamless dimming controlled by a 0-10V signal. The advanced internal circuitry ensures a flawless transition from darkness to light. With various color options and lumen outputs available, the Winglight is designed to enhance poultry performance according to your needs. Additionally, our 0-10V Bridge Controller allows easy integration with any poultry system that uses a 0-10V control signal, ensuring compatibility and precise control for optimal lighting results.

Application

This unit is designed to integrate seamlessly with our 0-10V Winglight Bridge Control, providing a smooth dimming experience with precise control. It's ideal for poultry applications that require accurate and reliable lighting adjustments.

Features

• Flicker free design tested by poultry experts
• Winglight source to sink control compatible
• 0.1% - 100% 0-10V dimming for control/precision
• Control up to 4 seperate zones with 250-300 lights max per zone
• Compatible with any poultry control that has a 0-10V control signal

Options

• Wide range of lumen outputs
• Variety of lens option's
• Customizable color temperature or CRI values
• POM or stainless latch options

Mounting

• Surface mount (This unit can be mounted directly to any ceiling or wall)
• Suspension mount (Chain mounting compatible by default)

Page 13

WL Series

Winglight, 0-10V Dimming Control
Poultry Specific Lighting
1-4 Zone Compatible

MADE IN CANADA

Product Description

Our 0-10V dimming control acts as a seamless bridge between traditional poultry barn controllers and our Winglight luminaires, therefore allowing users to operate lighting schedules and settings right from the main barn controler. It addresses the issue where 0-10V dimmable LED fixtures need a "sink" signal while poultry controllers provide a "source" signal by converting source signals into sink signals. With four independent zones, it enables you to manage lighting across different barns or areas, and its custom program ensures that light output directly corresponds to the percentage set on your poultry controller—so a 50% setting results in 50% light output.

Application

Poultry barns, usually in the poultry barn control room

Features

• 4 zone control compatability
• Universal compatibility (seamlessly connect your existing poulty barn control)
• 0.1% - 100% 0-10V dimming for control/precision
• Control up to 4 seperate zones with 250 lights max per zone
• Easy install and setup (Connect your dimming leads and AC power. Thats it)
• Run all of your lighting schedules on your main poultry control.

Options

• Operate each zone seperatly
• Proggramable dimming effects (Done by JW LED Inc.)
• Customizable color temperature or CRI values
• Barn specific light levels and light control

Installation

• Surface mount (This unit can be mounted directly to any ceiling or wall)
• Power the control by connecting AC Line voltage to the L, N and G ports and then connect your 0-10V inputs and outputs. Begin dimming.
• Basic configuration done beforehand by JW LED.

Approvals

Approved for use in Canada and USA

FL Series
LED Flood Light With Occupancy Sensor
6,500 - 26,000 Lumens

JW LED

Product Description

The FL Series flood lights are perfect for outdoor lighting, available in 50 to 200 Watt options. Their U-bracket support makes installation quick and easy, and a built-in occupancy sensor saves energy by automatically turning the light off during the day and on at night. Pre-wired with a 5-foot cord and male plug, they can be effortlessly plugged in or wired into a junction box. Designed for broad, efficient illumination, the FL Series combines convenience with excellent performance.

Application

This unit excels in outdoor industrial, commercial and agricultural settings where protection against Canadian climate is crucial. Installed in areas such as parrking lots, barn yards, outdoor hockey rinks, volleyball courts, general yards and many more. It's an exceptional choice for outdoor environments.

Features

• Yoke mount for easy installaion
• Occupancy Sensor/Daylight Sensor
• Wide light spread for your outdoor projects

Options

• Wide range of lumen outputs
• Various wattages
• Pre-wired cords for quick installation

Mounting

• Surface mount (This unit can be mounted directly to any ceiling or wall)

IN Series
Linkable LED Strip Lights
1,900-2,800 Lumens

Product Description

The IN Series luminaires are the epitome of versatility and ease of installation. Designed for general use, these fixtures feature a user-friendly plug-and-play setup that makes them ideal for retail environments, where quick and effortless installation is key. With a range of color and cord options, you can effortlessly customize the lighting to match any aesthetic. Plus, the IN Series luminaires can be seamlessly linked together to create a continuous row, offering a sleek and adaptable lighting solution for any space.

Application

These fixtures are incredibly versatile, making them suitable for a wide range of settings. Whether you need lighting under shelves, above workbenches, in offices, lunchrooms, or under cabinets, these luminaires fit the bill. They are also perfect for illuminating under racking, storage rooms, and containers, among many other applications.

Features

• Easy plug and play setup
• User friendly install
• Sleek design

Options

• 3 foot power cable with on/off switch
• 12, 39 and 59 inch extention/jumper cords
• Row mounting (Maximum 9pcs 4 foot or 13pcs 2 foot per row)
• 2 foot or 4 foot lengths available

Mounting

• Surface mount (This unit can be mounted directly to any ceiling or wall)
• Simple installation (Mounting clips included)
• Row mounting (Maximum 9pcs 4 foot or 13pcs 2 foot per row)

RL Series
T5 LED Lamp
2,800 Lumens

Product Description

The RL Series lamps provide an energy-efficient and cost-effective upgrade from traditional fluorescent lighting. Installation is straightforward, requiring only the bypassing of the ballast and direct wiring to the tombstones. With a wide range of color options, lens styles, and lumen outputs, these lamps are versatile and can seamlessly replace existing fluorescent or LED bulbs in virtually any fixture. Ideal for enhancing both performance and aesthetics, the RL Series combines ease of installation with flexible options to suit your specific lighting needs.

Application

This unit excels in any application that has existing lamps that you want to replace. Typically used in areas such as retail stores, offices, hallways, garages, shops, basements and many more commercial, industrial or agricultural settings.

Features

• Very high efficacy of 160 LM/Watt
• Ballast bypass, direct line voltage

Options

• Various lens style and color options
• Single end powered
• Double end powered

Mounting

• Lamp replacements, for use with T5 Tombstones
• For single end power, Non shunted tombstones are required
• For double end power, Shunted tombstones are suggested

GR Series
4 Foot LED Grow Light
40 UMOL Per Second

Product Description

The GR Series grow light is designed to support the growth of green plants and flowers. Easy to install under a shelf or in a growing area, it includes mounting clips for secure attachment with screws. Its plug-and-play feature makes it user-friendly for all gardeners. For best results, position the light 1 to 3 feet above your plants. Ideal for growing green plants before flowering, it helps produce robust plants with excellent yields.

Application

These fixtures are versatile and can be used in various settings, including under shelves, in greenhouses, above flowering pots, on grow light stands, and in growing rooms. Essentially, wherever your plants are, the grow light can be there too!

Features

• Easy plug and play setup
• 40 UMOL per second
• Water tight design

Options

• 5 foot power cable
• 2 foot extention/jumper cord
• Retail package kits

CB Series
LED Replacment Corn Bulb
2,600 - 13,000 Lumens

Product Description

The CB Series replacement bulbs offer a cost-effective LED lighting solution perfect for a variety of general-use areas. Specifically engineered to replace outdated fluorescent lamps, these bulbs deliver a powerful upgrade with a high lumen output. Their competitive pricing and energy efficiency make them an excellent choice for retail sales. Additionally, their straightforward installation ensures ease of use for both you and your customers, making them a smart addition to your product offering.

Application

These bulbs are a great choice for any application where you need for light than a general lightbulb can provide. Shed's, garages, shop's, work areas, storage and many more. Basically a great fit for your existing light bulb sockets.

Features

• Easy installation
• Energy Efficient
• Instant Start
• 360 degree light spread

Options

• 12-24V or 120-277V
• Variety of lumen outputs to choose from
• Upgrade from flourescent to LED
